# Checkpoint Answer Sheet

Use the evidence table to evaluate the atomic-model claim. Submit this sheet in U2 L1 Checkpoint Submission.

| | | | |
|---|---|---|---|
| Student name: | | Date: | |
| TOR: | | Course: | Chemistry |

**Claim to evaluate:** “Rutherford’s experiment proved that atoms are solid spheres with positive charge spread evenly throughout.”

| Observed path | Count out of 500 |
|---|---|
| Straight or nearly straight | 489 |
| Moderately deflected | 9 |
| Strongly deflected or backscattered | 2 |

**1. Is the student’s claim supported or not supported? State a clear claim.**

**2. Cite at least two specific values from the table as evidence.**

**3. Explain how the evidence supports the nuclear model.**

**4. State one limitation of the model or of this evidence.**

**Final check:** Your response includes a claim, numerical evidence, reasoning, and a limitation.
