Independent Application - Mystery Solid Investigation

Complete every numbered item. Correct this same PDF after Lesson Review.

Student name:

1. RESEARCH QUESTION

2. VARIABLES

Independent variable

3. SAFETY PRECAUTIONS

State two precautions appropriate for heating and cooling a solid sample.

4. DATA TABLE

Copy all 11 rows from the Moodle data set. Include units and the observed state.

Time (min)	Temperature (degrees C)	State

Save your work before continuing to page 2.

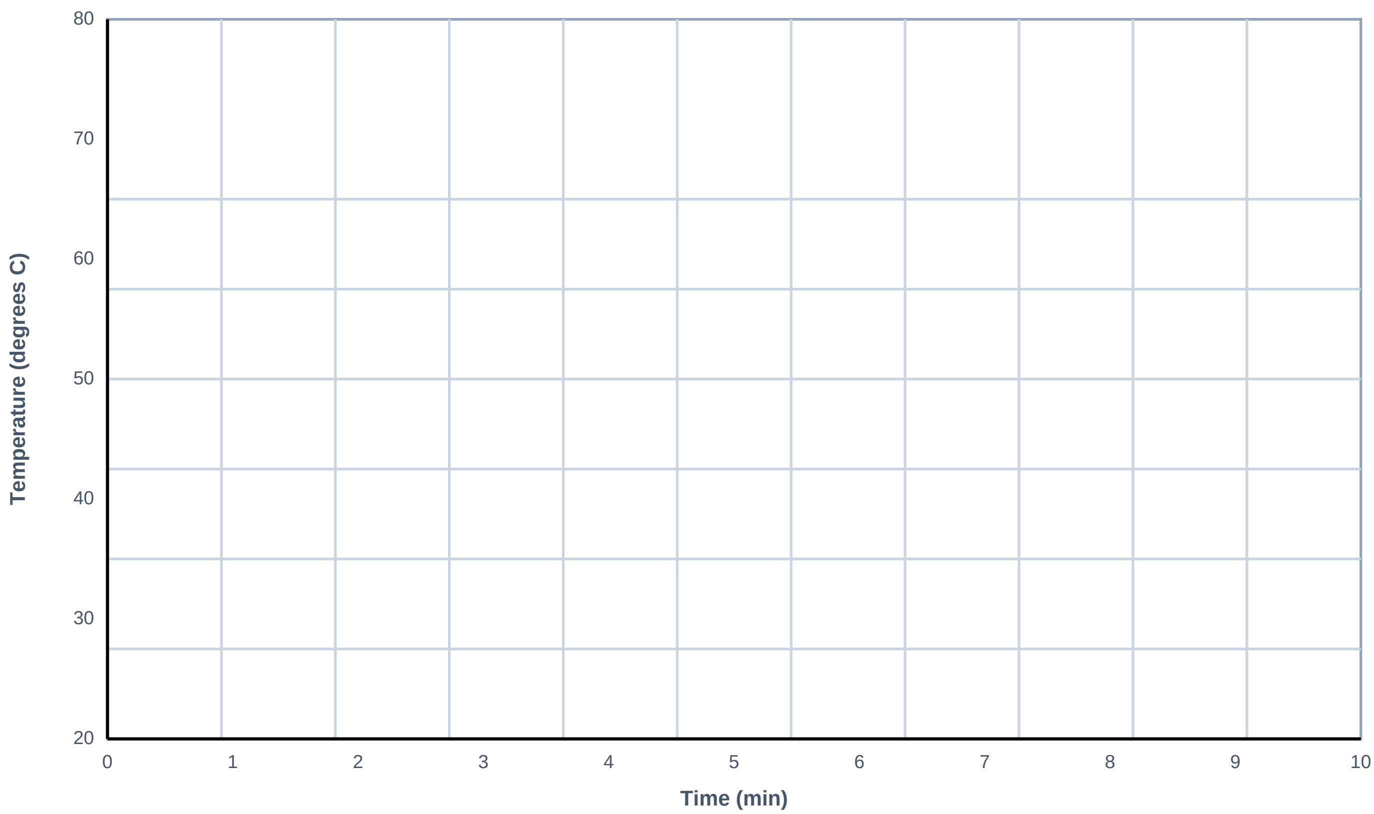
Mystery Solid - Graph and Particle Analysis

Use the data table from page 1.

5. TEMPERATURE-TIME GRAPH

Plot every point. Connect the points in time order. Add a descriptive graph title.

Graph title:



6. FLAT REGIONS NEAR 63 DEGREES C

Describe both flat regions and explain what is happening to particle motion and arrangement.

Use a PDF drawing tool or print this page to plot the graph clearly.

Mystery Solid - CER and Correction Record

Use at least three exact pieces of evidence.

7A. CLAIM

7B. EVIDENCE - AT LEAST THREE SPECIFIC RESULTS

7C. REASONING - CONNECT THE EVIDENCE TO PARTICLE IDENTITY

AFTER LESSON REVIEW - CORRECTION RECORD

Keep the original response. Type corrections below, or state "No correction needed" and explain why.
