

Independent Application - Phase Change CER Organizer

Download, complete, correct after Lesson Review, and submit this PDF.

Student name:

Date:

Question 1: Is a phase change a physical change or a chemical change?

Use ice melting and dry ice changing to gas as evidence. Explain what happens to chemical identity.

CLAIM

EVIDENCE 1 - ICE MELTING

EVIDENCE 2 - DRY ICE SUBLIMATING

REASONING

Connect particle arrangement and state to the fact that chemical identity remains unchanged.

AFTER LESSON REVIEW - CORRECTION RECORD

Compare your CER with the possible answer. Do not erase the original response.

Type the corrected statement below, or type "No correction needed" and explain why.
