

Checkpoint Answer Sheet

Name: _____ Date: _____

1. Calculate molarity of 9.80 g H_2SO_4 in 0.250 L.
2. Find moles in 125 mL of 0.400 M NaOH.
3. Calculate the volume of 3.00 M stock needed for 250 mL of 0.600 M solution.
4. Draw and label particle models for a dilute and concentrated solution.
5. Explain why dilution changes molarity but not moles of solute.
