

Independent Application Answer Sheet

Name: _____ Date: _____

1. Calculate molarity for 0.750 mol KCl in 1.50 L.
2. Calculate molarity for 11.7 g NaCl in 0.400 L.
3. Find moles in 250 mL of 0.300 M solution.
4. Find stock volume needed to make 500 mL of 0.200 M from 2.00 M stock.
5. Compare two particle models and identify the more concentrated solution.
6. Complete the linked simulation observations.

Correction record: problem(s) corrected _____; error identified _____
