

Independent Application Answer Sheet

Name: _____ Date: _____

1. Identify the limiter for 3 mol H₂ and 1 mol O₂.
2. Calculate water produced in that case.
3. Calculate percent yield for 18.0 g actual and 20.0 g theoretical.
4. Explain a possible yield below 100%.
5. Explain why yield above 100% signals an issue.
6. Complete three linked simulation trials.

Correction record: problem(s) corrected _____; error identified _____
