

CHEMISTRY | UNIT 03 | LESSON 05

Intermolecular Forces

Independent Application Answer Sheet

Name: _____ Date: _____

MLA standards: MLA.CHEM.BON.01

Follow the exact PhET Molecule Polarity steps in Moodle. Change only one variable at a time.

Trial	Screen / arrangement	Electronegativity difference	Dipole / partial-charge evidence
1	Two Atoms - equal		
2	Two Atoms - moderate		
3	Two Atoms - largest		
4	Three Atoms - symmetric		
5	Three Atoms - asymmetric		

Analysis

1. How does electronegativity difference affect bond dipole?

2. Why can bond dipoles cancel in a symmetric molecule?

3. Use one trial to explain how molecular polarity affects intermolecular attraction.
