

CHEMISTRY | UNIT 03 | LESSON 06

Chemical Formulas and Compound Composition

Independent Application Answer Sheet

Name: _____ Date: _____

MLA standards: MLA.CHEM.BON.02

Follow the exact PhET Build a Molecule directions in Moodle. If a target is unavailable, draw and label the model.

Molecule	Formula	Element counts	Model / subscript evidence
Water	H ₂ O		
Carbon dioxide	CO ₂		
Ammonia	NH ₃		
Methane	CH ₄		

Analysis

1. Explain how a subscript represents atom count.

2. Explain why a coefficient multiplies the entire formula.

3. Compare the information communicated by a particle model and a chemical formula.
