

CHEMISTRY | UNIT 02 | LESSON 04

Electron Arrangement and Periodic Position

Checkpoint Submission

Student name:		Date:	
MLA standard:	MLA.CHEM.ATO.03	Submission:	Checkpoint Submission

Directions

Complete independently. Use the simplified energy-level model taught in the lesson. Show your reasoning and upload this PDF to U2 L4 Checkpoint Submission.

Part A - Electron arrangements

Element	Atomic #	Neutral e-	Arrangement	Occupied levels	Valence e-
oxygen	8				
aluminum	13				
chlorine	17				

Part B - Periodic position and reasoning

1. State the period of oxygen, aluminum, and chlorine. Explain how the occupied energy levels support each answer.

2. Aluminum and chlorine are both in Period 3. Explain why they are in different groups and are expected to behave differently.

3. A neutral unknown atom has the arrangement 2, 8, 2. Identify its period, its valence-electron count, and the element that matches atomic number 12.
