

CHEMISTRY | UNIT 03 | LESSON 06

Chemical Formulas and Compound Composition

Checkpoint Answer Sheet

Name: _____ Date: _____

MLA standards: MLA.CHEM.BON.02

Show every calculation and include units or atom labels.

Expression	Count each element	What the numbers mean
CaCl ₂		
Al ₂ O ₃		
C ₆ H ₁₂ O ₆		
2 H ₂ O		

1. Explain the difference between a coefficient and a subscript.

2. Write the formula for a molecule containing 2 N atoms and 5 O atoms.

3. Draw and label a particle model representing the Al:O ratio in Al₂O₃.

4. CER: Prove that 3 CaCl₂ contains 3 Ca atoms and 6 Cl atoms.
