

Independent Application Answer Sheet

Name: _____ Date: _____

1. Calculate the percent by mass of Na and Cl in NaCl. Use Na = 22.99 and Cl = 35.45.
2. Calculate the percent by mass of Ca in CaCO₃. Use Ca = 40.08, C = 12.01, O = 16.00.
3. Determine the empirical formula for 2.40 g Mg and 1.58 g O.
4. Determine the empirical formula for 40.0% C, 6.7% H, and 53.3% O.
5. Determine the empirical formula for 43.7% P and 56.3% O.
6. Explain the difference between an empirical formula and a molecular formula.
